Understanding Negative Numbers

Questions

1. Below is a lift panel with two missing floor numbers.

a) What are the two missing numbers?

b) Nina is on floor 3. She goes down 4 floors.

What floor is she on now? _____

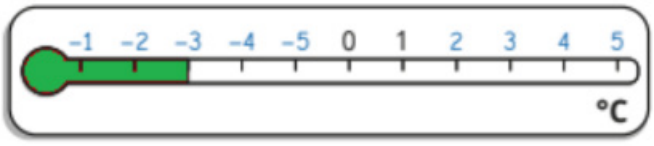

c) Leo is on floor 0. He goes down 3 floors.

Where does he end up? _____

d) Mia is on floor –1. She climbs up 5 floors.

Which floor does she reach? _____

2. Alex tried to label a thermometer but made a mistake.

a) What is the mistake?

b) Show how to correctly label this scale:

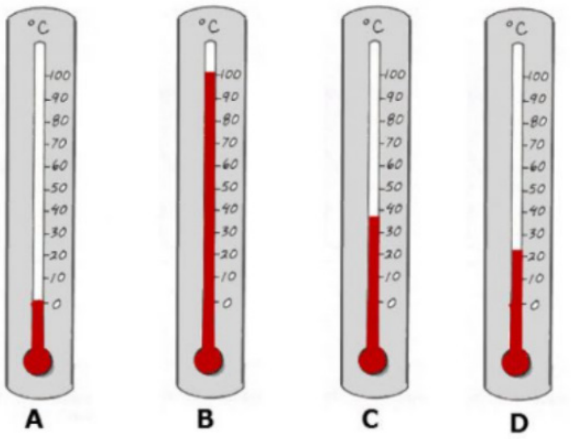

–4, ___, –2, ___, 0, ___, 2, ___, 4

(Fill in the blanks with correct numbers.)

c) What temperature is exactly between **–2°C and 2°C**? _____

Pencil Maths

3. Look at the thermometers and answer the questions.

a) Write the temperature shown on each thermometer:

1st thermometer: _____ °C , **2nd thermometer:** _____ °C

3rd thermometer: _____ °C, **4th thermometer**: _____ °C

b) Which thermometer shows the **warmest** temperature? _____

c) Which thermometer shows the **coldest** temperature? _____

4. Below sea level, different animals are swimming at various depths.

a) A jellyfish is at –5 m. A dolphin is at –3 m.

Who is deeper underwater? _____

b) A shark swims 4 m deeper than the fish at –2 m.

What depth is the shark at? _____

c) Complete the sentence:

The crab is 3 metres above the diver at –7 m.

The crab is at _____ m.

5. Leo says, "–2 is greater than –6 because 6 is a bigger number."

Is Leo correct? Explain why or why not.

Pencil Maths

6. Emma, Sam, and Raj are on different floors in a deep-sea research building.

–4 –3 –2 –1 0 1 2 3

Emma is on floor –3

Raj is on floor 2

Sam is somewhere between them.

What floor could Sam be on?

_____

7. The temperature in Oslo is **–4°C.** The temperature in Rome is warmer than Oslo, but still below freezing **(0°C).**

List all possible whole number temperatures that Rome could be at:

8. A submarine dives from **–3 m** to **–9 m.** Mia says, **"The submarine moved 5 meters."** Is she right? If not, what is the correct distance?

9. Arjun says, **"If I go up 4 floors from –3, I will reach floor 1."** Do you agree? Show how you know.

10. Arrange these temperatures from coldest to warmest:

–5°C, –2°C, 0°C, –9°C

a) –9°C, –5°C, –2°C, 0°C

b) 0°C, –2°C, –5°C, –9°C

c) –5°C, –9°C, –2°C, 0°C

d) None of the above
